Tools:

Summary:

As a developer has not yet worked. I study React. I am writing a test project of a social network. Where React, Redux is used. And also used: redux-form, redux-thunk, react-router, reselect. TypeScript will be used shortly.

So far, the project has been initiated through NPM, but in the future, I will use Yarn.

I now work as a Project Manager. Prior to that, worked as a Sales Manager.

There has always been an interesting development. Working as a manager, I try to look at the decisions of developers, ask and interested in what and why was done.

This text was typed with "Grammarly". =)

Work experience:

2020 → present time
Quardex

Project Manager

Duties:

Task tracking. Project supporting. Task planning. Speaking with clients.

Achievements:

When working as PM, I saw projects on React.js, Vue.js. Some of the projects were with "Strapi" and "Gatsby.js". On one project, I helped to connect some data from Strapi to React.js front (because the dev of this project leave the company and we need to end this part of work).

On some projects, we have an Amazon AWS system. With another PM we tried to help our client with domains and etc.

2018-2020
SREDA Digital

Sales manager

Duties:

Processing incoming requests

Drawing up a commercial proposal in different formats (depending on the requirements and wishes of the client). Setting and checking tasks for Pre-sale. After the conclusion of the contract and receipt of funds, the transfer of the client in the "production" to an account manager.

Achievements:

Participated in the development of a new type of personalized commercial offers.
Participated in the development and preparation of regulations in the sales department.
Participated in testing strategies, where it was necessary to "raise" sites, constantly change landing pages, set up domains, and so on.

In parallel, I managed a team of 5 people (2 copywriters, SEO specialist, PPC-specialist, developer) on a lead generation project.

2017-2018
Juergen

Design Engineer

Development of 3D models, preparation of files for machine tools
(layout of parts on standard sheets of material)

2016-2017

UBC Group

Design Engineer

Development of design documentation. Development of 3D models and drawings of parts and equipment in general. Product support from design to implementation (field supervision).

Education:

National Technical University "Kharkiv Polytechnic Institute"

Degree Name: Specialist

Degree Field Of Study: Energetic

Dates attended or expected graduation: 2010 – 2016
